To Whom It May Concern:

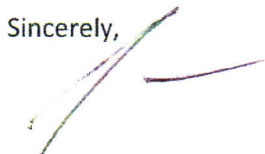

It is with great enthusiasm that I recommend Keith Shaw Construction Management Services (CMS). Seminole Schools chose CMS to manage the construction of a 14,000 square foot addition to the Betty L. Smith Early Childhood Center. The project was completed ahead of schedule and significantly under budget.

CMS participated in the project from the onset. Beginning with the initial meetings with architects, CMS worked hand in hand with administrators to ensure compliance with laws and selection of quality sub-contractors.

Once construction commenced, CMS worked diligently to ensure the sub-contractors completed the work on schedule and in a satisfactory manner. Any issues which arose were promptly handled by CMS.

Seminole Schools is very appreciative of Keith Shaw and CMS. The guidance CMS provided through the project allowed it to come in well under budget. The dollars saved funded multiple improvements throughout the district, which provided a much greater return on investment for district tax payers. For these reasons, Seminole Schools highly recommends CMS.

Sincerely,

Jeff Pritchard
Superintendent
