

D.C. ASSOCIATES
ARCHITECTS - PLANNERS

January 30, 2014

To Whom It May Concern:

As an Architect, I have worked with a number of Construction Managers on a variety of projects over the years. Without a doubt, Keith Shaw, stands head and shoulders above the others. In my opinion, his ability to satisfy his client's needs, while constructing top-quality projects, sets him above the rest. His ability to control costs while meeting the client's wishes sets him a cut above the all the Construction Managers I have worked with.

He also has a unique ability to organize a project from it's very conception through final completion, giving his clients an advocate they can depend on to as they work through all of the varied obstacles they encounter.

In summary, I highly recommend Keith Shaw as your Construction Manager. The selection of Keith Shaw is one of the best decisions you can make to insure your project is completed both on time and within budget.

Sincerely,

David Cottingham
