June 2, 2003

To Whom It May Concern:

When we decided to build our new Medicine Shoppe pharmacy we spoke with several contractors who tried to tell us what was wrong with our plans and why we should change them. Keith Shaw (Construction Management Services) looked at the plans, answered our questions and gave us an estimate below all the others.

Keith hired quality sub-contractors who completed their work without delay. We were consulted at every step in the process and made several changes along the way. Keith also helped us resolve problems with the city and was able to meet their requirements without affecting our budget.

We were especially impressed with the monthly budget updates and clear, concise accounting of expenses. Our bank loan officer said she had never worked with a builder who was so organized and professional.

We are now working in a beautiful new building that we feel is an asset to the community, and last, but not least, CMS did it under budget.

Sincerely,

Mike Vorndran  
President
